

Git Installation Guide

Step 1: Download Portable (Git for Windows/x64 Portable) ("thumbdrive edition")

Source: https://bpicomph-my.sharepoint.com/:u:/g/personal/amtalib_bpi_com_ph/EXb3lnE-BQdNvBjh5opSUyYB_LZXBTsYDZ2aL8OYqtGu-A?e=AIFlpK

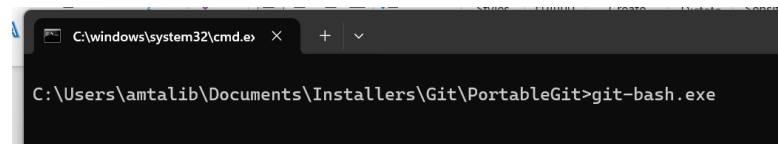

Alternative source: <https://git-scm.com/install/windows>

Step 2: Double click PortableGit-2.52.0-64-bit.7z to extract

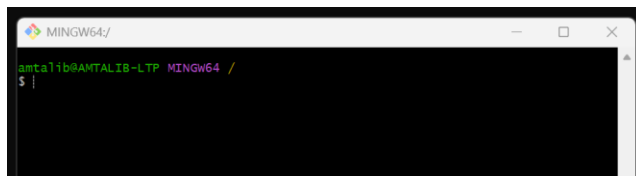

Step 3: Run git-bash.exe from the extracted folder to test.

a. *Open command prompt*

b. *cd C:\Users\amtalib\Documents\Installers\Git\PortableGit*

c. Type ***git-bash.exe*** and press **Enter** to execute.

Step 4: Create GIT_HOME in environment variable

setx GIT_HOME "<Replace with the path of PortableGit>\PortableGit"

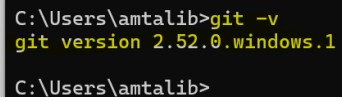

Step 5: Add the GIT_HOME to your PATH if you want to use git from Command Prompt.

setx PATH "%GIT_HOME%\bin;%PATH%"

Step 6: Open new Command Prompt window and type the following command to validate **git**.

`git -v`

A screenshot of a Windows Command Prompt window with a black background and yellow text. The prompt shows the command 'git -v' being entered and executed. The output is 'git version 2.52.0.windows.1'. The prompt is currently at 'C:\Users\amtalib>'.

```
C:\Users\amtalib>git -v
git version 2.52.0.windows.1
C:\Users\amtalib>
```
